Quote • Procure • Engineer • Build • DFM Report

A norcott service designed to keep our customers at the front when it comes to getting new product designs to market quickly; by providing a seamless experience from start to finish...the path of least resistance for all your urgent printed circuit assembly requirements...

Norcott

slipstream 🔟 service:

- 24 hr Quotation Response
- Rapid Procurement
- Rapid Engineering
- Rapid Build
- Design for Manufacture (DFM) Report

Why don't you give it a go... enquiries to - sales@norcott.co.uk

The slipstream () service has been introduced by norcott to meet the needs of today's electronic designers and engineers.

In a dynamic and evolving marketplace, new product development is a key component of a successful business strategy.

Technical complexity, reduced timescales and legislative influences are making development significantly more complicated. We recognise these pressures and have designed our slipstream () service to actively support your development programs providing a valuable resource in the physical realisation of your new products by simplifying our service into a 10 day cycle - 5 day for procurement and engineering and 5 day for build and DFM report.

Rapid Procurement - we will try to source everything ex-stock where possible. Rapid Engineering - this will run concurrently with procurement to maximise time scales.

Rapid Build

Design for Manufacture (DFM) Report

Quality

- Machine build.
- Automatic Optical Inspection.
- Quality standard IPC-A-610

Note:

The service is designed to meet the needs of standard rigid type build product and not for specialist boards such as flexibile, flexi-rigid which are usually on longer delivery timescales from manufactures.

Also board material such as Berquist and Rogers tend to be on longer lead times and not always available on a quick turnaround. As with all board builds the start date will be subject to material availability.
